

Power To The People

After Eric Liu's New York Times Article

May we go knee deep with masks off and shells broken

Where this space that was never allotted to us but still require us to be

Friction and cobblestone to all gentrified smooth surfaces

You tell me only touch the surface, do not dig or crack any gravel

Do not look for the answers if they are not shown to you

But minors have always been curious

So minorities make mindful steps to remember that *power* compounds with the compilation of their voices

That *power* justifies which ignites angst and anger to act

And the antithesis to such passive aggressive dominance is infinite *power*

That governs in ways that weigh the world's morale

Power to the People

To the People know your *Power*

Power to the People

To the People know your *Power*

Power to the People

To the People know your *Power*

Pass... this... purpose... on
